**Third Grade**

Dear Parents,

We are very proud of the academic growth our students have made this school year and the work that they have done. The “summer slide” or summer learning loss has been an issue schools and educational experts have been concerned about for a while. We want our students to enjoy their summer while at the same time continuing to hold on to the progress that they made during the school year.

Attached are calendars for June and July with weekly activities and guardian initial upon completion. These activities do not have to be completed within their given week. We are just asking that they are all completed by the beginning of the new school year. We have put them into a calendar to spread them out throughout the summer. Spaced practice is much more beneficial to students than cramming it all into the last week or so of summer. Continued reading and math fact practice strengthens students’ fluency and comprehension.

Reading work will include taking Accelerated Reader (AR) tests. It is important that students are reading books on their level and not choosing books that are too easy or way too hard. Below are the recommended book levels for your child. You can look up the level of a book on [arbookfind.com](http://arbookfind.com).

**Recommended Book Levels:** \_\_\_\_\_

Below is also a challenge section. If students go above and beyond the required work, they will receive a reward for their efforts.

**Students are required to complete the work from the attached calendars. These assignments are due by Friday, August 13<sup>th</sup> and will count as the students’ first reading and math grades.**

**Summer Challenge:** *(Optional)*

Complete all of these additional “above and beyond” activities to receive a prize when we get back to school.
