

Flex Summer Math Packet Practice: Entering 7th or 8th Grade Pre-Algebra

This packet is designed to help student stay on track over the summer and enter Pre-Algebra confident and prepared for a great school year. Math teachers have selected 6 skills that are important for students' success in Pre-Algebra. If a student struggled with these concepts, we highly recommend they watch the instructional videos and review the notes provided. The instructional videos, available via Khan Academy, may be viewed easily by scanning the QR codes with a smartphone. After watching a video, students can choose to continue watching videos for extra help or work problems live on the site with immediate feedback. **All pages of this packet, plus the grade-appropriate requirement of the Multiplication Math Fact Fluency and Speed packet, will be submitted as students' first math grade of the school year. Show ALL work to receive full credit!**
