Fourth Grade

Dear Parents,

We are so proud of the academic growth our students have made this year and the hard work they have put in! To continue building on their success, we want to be proactive about a common challenge known as the “summer slide” — the loss of skills over the summer months. We want students to enjoy a well-deserved break while also maintaining the progress they've worked so hard to achieve. To help with this, we are sending home a packet of practice skill pages along with required summer activities.

Here's what students are expected to complete. Check off each activity as you finish it:

- ☐ **Chapter Book Reading:** Students must read *Tales of a Fourth Grade Nothing*. Please note that you must purchase the book on your own. It is not provided with the summer work.
- ☐ **Chapter Book AR Test:** Students must take the AR (Accelerated Reader) test once they finish the book.
- ☐ **Math:** Students must achieve **7 green lights** in Reflex Math over the summer.
- ☐ **Chapter Book Packet Pages:** Student must complete all packet pages of chapter book activities.
- ☐ **Math Practice Pages:** Students must complete all math packet pages. For the 6 fact practice sheets at the end of the packet, time yourself for 2 minutes. Circle the last fact you answered in a minute, and then complete the rest of the page.

We've included a suggested pacing guide to help your child spread the work out evenly. While the pacing is optional, spreading the work out (instead of saving it all for the end) is far more effective for learning and retention.

Reading with your child remains one of the most powerful ways to support their learning. Please encourage your child to choose books that are at the right reading level — not too easy and not too hard. To find the level of any book, you can visit arbookfind.com. Below, you'll find your child's recommended reading levels.

AR website: <https://global-zone51.renaissance-go.com/welcomeportal/211290>

Dear Parents,

As your child prepares to enter 4th grade, developing strong multiplication fact fluency is essential to their success in mathematics. Being able to quickly and accurately recall multiplication facts is a foundational skill that supports problem-solving, higher-level math concepts, and overall confidence in the classroom.

We encourage your child to practice regularly so they can master this important skill. By the start of 4th grade, students should be able to complete a multiplication timed test 60 multiplication facts in 2 minutes. This benchmark ensures they are well-prepared to tackle more advanced topics, such as division, fractions, and multi-digit multiplication. **If they haven't reached at least an 80% (48/60) fluency level by the beginning of 4th grade, please understand that weekly math facts homework will be required to get them up to pace.** We have included blank practice tests in the summer work. Feel free to make multiple copies so they can practice all summer.

You can support your child's learning journey by integrating fun and engaging activities at home, such as flashcards, online games, or timed challenges. Working together, we can help your child build a strong math foundation that will serve them for years to come.

Thank you for your partnership in helping your child thrive!

Sincerely,

Elementary Division

Summer Challenge: (Optional)

Below is also a challenge section. If students go above and beyond the required work, they will receive a reward for their efforts. Complete all of these additional "above and beyond" activities to receive a prize when we get back to school.
